PROGRAM DISCRIPTION

LA Test Prep & Pre-license Course

This course provides the student with the state-specific material that follows the Exam Content Outline issued by the Louisiana Department of Insurance. The course covers the terms, concepts, and regulations necessary to successfully pass the state exam. The material is easy to understand and is supported by practice exams that provide the student with instant feedback on their understanding of the material and reinforce what they have learned.

Automobile Adjuster Boot Camp

This course is designed to produce a professionally trained auto adjuster or estimator who can manage an automobile insurance claim from start to finish. Student will learn how vehicles are constructed, understand frame and body structures, components of a vehicle, and be introduced to the automobile estimate software. This course was designed to provide students with the basic skills and knowledge to help you be successful in handling automobile claims, understanding basic vehicle construction, cosmetic and collision damage analysis, estimating minor to severe collision damage, and total loss handling
